About Ruixiong

Shenzhen Ruixiong Packaging Products Co., Ltd. is a professional flexible-packaging manufacturer with 22 years of industry expertise and 11 years of factory operation, running a 3,000 m² modern production base certified to ISO 9001 quality and ISO 14001 environmental management systems. Equipped with high-speed rotogravure presses, precision laminators and fully automatic bag-making lines, we keep printing, laminating and bag-making entirely in-house, with an annual capacity of over 300 million bags serving 1,000+ clients worldwide. We focus on high-quality plastic packaging solutions for food, electronics, personal care, pharmaceutical and industrial sectors, supporting custom multi-layer laminates and diverse pouch formats. With the whole process under one roof - no outsourcing, no middlemen - we deliver controllable lead times, stable quality and optimized costs, handling both volume orders and flexible small-batch sampling as a long-term packaging partner you can trust.

Mission

Relentlessly protecting product safety and elevating the value of packaging

Vision

To be a packaging company customers trust, serving every corner of the world with safe, eco-friendly packaging technology

Values

Protect the planet • Quality first • Customer success • Mission accomplished

22 years of industry expertise, 12 years dedicated to packaging production, trusted by 1000+ clients — quality assured by ISO 9001 & ISO 14001 dual certification

Manufacturing • Full In-House Chain

Printing, laminating and bag-making all happen in-house — no outsourcing, no middlemen. Controlled lead times, stable quality, optimized cost.

Rotogravure Press

High-speed rotogravure printing with vivid color reproduction, up to 10 colors

Laminator

Precision dry lamination bonds multi-layer films without delamination

Pouch-Making Machine

Fully automatic pouch making with stable dimensions and flat seals

Die-Cut Bag Machine

Die-cut and stand-up pouch forming in diverse formats

Slitting Machine

High-precision slitting of roll film to any width

Folding Machine

Film folding and flattening for precise downstream forming

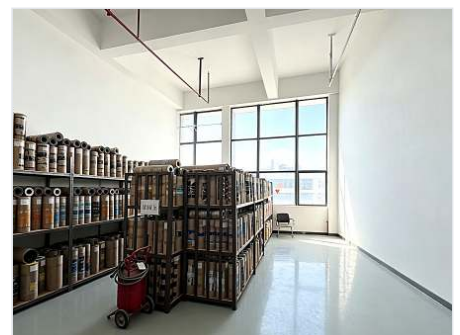

Film Laminating Machine

Matte / gloss lamination for surface texture and durability

Curing Room

Constant-temperature curing for bond strength and food safety

Cylinder Warehouse

Dedicated cylinder storage - faster reorders and lead times

Product Index

64 products across four series: laminated pouches, paper & eco, general plastic, and protective & express packaging.

品名	烧烤毛刷
规格	10cm
数量	100个
生产日期	2023.08

生产厂家：深圳市宝安区西乡街道西乡社区西乡大道100号
地址：深圳市宝安区西乡街道西乡社区西乡大道100号

Material

Multi-layer plastic laminate combining BOPP, PET, PE and other films as needed. Mature lamination with firm inter-layer bonding, stable heat seals, good dust and moisture protection; food-grade materials available.

Structure & Craft

- **Three-side seal** — bottom and sides sealed, top open for filling; flat, crisp format suits long, slim products.
- Top hang hole for direct shelf display in supermarkets and e-commerce.
- Optional clear window shows the product; full-color printing with faithful colors.
- Side tear notch for easy opening; tight seals prevent spills.

Key Advantages

- ✓ Strong print quality — full logos, parameters and warnings
- ✓ Multiple laminate configurations for moisture- or puncture-resistance needs
- ✓ Neat format fits long or irregular small products
- ✓ Window option balances display and protection
- ✓ Reliable heat seals survive transport
- ✓ Broad applications: food, tools, small commodities.

APPLICATIONS

BBQ tools

kitchen accessories

disposables

stationery

small hardware

snacks

consumables

CUSTOMIZATION

— **Size** any dimensions— **Printing** 4-8 color HD— **Options** clear window, hang hole, tear notch, food-grade material, thicker film.

Three-Side-Seal Pure Foil Pouch

Material

Multi-layer pure-aluminum laminate: the pinhole-free foil layer plus tightly bonded films give ultra-high barrier performance and excellent heat sealing. Medical- and food-grade materials available.

Structure & Craft

- **Three-side seal** with top filling opening; flat, well-shaped body for sheet and small-item packaging.
- Perforated tear line or round notch optional for smooth opening; color printing with faithful reproduction.
- All-foil construction is fully opaque — blocks light, water vapor and air with stable sealing.
- Firm seals withstand pressure and pulling without burst edges or leaks.

Key Advantages

- ✓ Ultra-high barrier: light-proof, moisture-proof, oxygen-proof — long-term protection
- ✓ Superb air-tightness for materials needing long storage
- ✓ Fine printing of logo, parameters and warnings
- ✓ Flexible, puncture-resistant — safe in logistics
- ✓ Plain silver or full-color printed versions
- ✓ Broad use: medical devices, masks, powders, pharma, raw materials.

APPLICATIONS

Dental instruments

medical consumables

facial masks and skincare

powder materials

dried food

reagents

CUSTOMIZATION

— **Size** any dimensions— **Printing** 4–8 color HD— **Options** tear notch, perforated tear line, food/medical grade, thicker film.

Three-Side-Seal Zipper Laminate Pouch

Material

Multi-layer plastic laminate, available with glossy, matte or semi-frosted films. Layers bond firmly, heat sealing is stable, dust- and moisture-proof; barrier grade customizable.

Structure & Craft

- **Three-side seal + top zipper:** sealed on sides and bottom, self-locking zipper on top for repeated resealing after opening.
- Euro hang hole as standard — fits supermarket shelving and online/offline retail.
- Optional clear window shows the product; HD color printing with faithful colors for brand packaging.
- Side tear notch for easy first opening; tight seals prevent splitting in transit.

Key Advantages

- ✓ Resealable zipper lets customers store the product after opening
- ✓ Great display: window versions show the goods, print quality is strong
- ✓ Multiple film configurations — matte, frosted or glossy
- ✓ Neat format with flexible sizing for cables, digital accessories and daily goods
- ✓ Hang hole for supermarket and convenience-store display
- ✓ Tough and tear-resistant in logistics.

APPLICATIONS

Data cables

chargers

earphones

phone accessories

small electronics

jewelry

daily sundries

small hardware

CUSTOMIZATION

— **Size** any dimensions— **Printing** 4-8 color HD— **Options** clear window, euro hang hole, tear notch, frosted matte film, thicker film.

Three-Side-Seal Foil Laminate Pouch

Material

Aluminum-foil multi-layer laminate with tight bonding and stable heat seals. The foil layer delivers an outstanding barrier against light, water vapor and air; matte or glossy finish; cosmetic-grade materials supported.

Structure & Craft

- **Standard three-side seal:** sides and bottom sealed, top left open for filling; flat, crisp format for single-piece packaging.
- Round tear notches on both sides for easy opening; reinforced seals resist leaks and burst edges.
- Large-area fine color printing with gradients, patterns and hot-stamping for a premium look.
- Flexible sizing for small doses of powder, essence and mask packaging.

Key Advantages

- ✓ High-barrier foil keeps light, moisture and oxygen out — contents stay active longer
- ✓ Strong print expression for premium oriental or minimalist luxury styles
- ✓ Excellent leak-proof sealing for skincare and powder products
- ✓ Flexible, crush-resistant — low damage in bulk transport
- ✓ Versatile sizes, widely used for single-piece packs.

APPLICATIONS

Mask sachets

skincare powders

essence samples

cream products

medical-aesthetic consumables

food powder

CUSTOMIZATION

- **Size** any dimensions
- **Printing** 4-8 color HD
- **Options** tear notch, matte/glossy, hot gold/silver stamping, thicker film.

Three-Side-Seal Zipper Pouch (Full-Print)

Material

Multi-layer laminated film with tight bonding and stable heat seals. Glossy or matte film optional; barrier level configurable; dust- and moisture-proof for a wide range of products.

Structure & Craft

- **Three-side seal + top self-locking zipper** — resealable storage after opening.
- Full-surface HD printing supports 3D visuals and gradient colors for a differentiated brand look.
- Reinforced seals stay intact under transport pressure; flat, crisp finished bags.
- Flexible sizes for independent packaging of small items.

Key Advantages

- ✓ Resealable zipper improves the customer experience
- ✓ Outstanding print effects for trendy, creative artwork — high shelf impact
- ✓ Rich film choices; glossy finish looks premium
- ✓ Sturdy build survives long-haul logistics
- ✓ Flexible specs, multi-language export printing supported.

APPLICATIONS

Jewelry

daily sundries

candy and snacks

beauty accessories

digital accessories

aromatherapy items

export small goods

CUSTOMIZATION

- **Size** any dimensions
- **Printing** 4-8 color HD, multi-language
- **Options** tear notch, matte/glossy film, thicker film, specialty printing.

Three-Side-Seal Facial Mask Pouch (Type 6)

Material

Multi-layer functional laminate with firm bonding and excellent puncture and permeation resistance. The film locks in essence, preventing leaks and evaporation; glossy, matte or foil versions available — built for beauty and skincare filling lines.

Structure & Craft

- **Standard three-side seal** with top hang hole for hook display; made for single-sheet mask packaging.
- Side tear notch opens without scissors; high-temperature reinforced seals hold essence liquid without bursting.
- HD color printing of multi-language text, diagrams and parameters — meets export daily-chemical packaging rules.
- Rounded corners: no sharp edges, soft in the hand, refined look.

Key Advantages

- ✓ Leak-proof construction locks the essence in through storage and transport
- ✓ Stable barrier slows essence oxidation and keeps formulas stable
- ✓ Hang hole for shelf display, online and offline
- ✓ Print styles cover Japanese and Korean beauty aesthetics
- ✓ Safe rounded corners — bags survive bulk cartoning.

APPLICATIONS

Single-sheet essence masks

eye masks

wet compresses

skincare samples

essence sheets

disposable beauty items

CUSTOMIZATION

— **Size** any dimensions— **Printing** 4–8 color HD, CN/Jp/EN text— **Options** hang hole, tear notch, matte/glossy, foil version, rounded corners.

Three-Side-Seal Facial Mask Pouch (Type 7)

Material

Multi-layer functional laminate with firm bonding and excellent puncture and permeation resistance. The film locks in essence, preventing leaks and evaporation; glossy, matte or foil versions available — built for beauty and skincare filling lines.

Structure & Craft

- **Standard three-side seal** with top hang hole for hook display; made for single-sheet mask packaging.
- Side tear notch opens without scissors; high-temperature reinforced seals hold essence liquid without bursting.
- HD color printing of multi-language text, diagrams and parameters — meets export daily-chemical packaging rules.
- Rounded corners: no sharp edges, soft in the hand, refined look.

Key Advantages

- ✓ Leak-proof construction locks the essence in through storage and transport
- ✓ Stable barrier slows essence oxidation and keeps formulas stable
- ✓ Hang hole for shelf display, online and offline
- ✓ Print styles cover Japanese and Korean beauty aesthetics
- ✓ Safe rounded corners — bags survive bulk cartoning.

APPLICATIONS

Single-sheet essence masks

eye masks

wet compresses

skincare samples

essence sheets

disposable beauty items

CUSTOMIZATION

- **Size** any dimensions
- **Printing** 4-8 color HD, CN/JP/EN text
- **Options** hang hole, tear notch, matte/glossy, foil version, rounded corners.

Three-Side-Seal Facial Mask Pouch (Type 8)

Material

Multi-layer functional laminate with firm bonding and excellent puncture and permeation resistance. The film locks in essence, preventing leaks and evaporation; glossy, matte or foil versions available — built for beauty and skincare filling lines.

Structure & Craft

- **Standard three-side seal** with top hang hole for hook display; made for single-sheet mask packaging.
- Side tear notch opens without scissors; high-temperature reinforced seals hold essence liquid without bursting.
- HD color printing of multi-language text, diagrams and parameters — meets export daily-chemical packaging rules.
- Rounded corners: no sharp edges, soft in the hand, refined look.

Key Advantages

- ✓ Leak-proof construction locks the essence in through storage and transport
- ✓ Stable barrier slows essence oxidation and keeps formulas stable
- ✓ Hang hole for shelf display, online and offline
- ✓ Print styles cover Japanese and Korean beauty aesthetics
- ✓ Safe rounded corners — bags survive bulk cartoning.

APPLICATIONS

Single-sheet essence masks

eye masks

wet compresses

skincare samples

essence sheets

disposable beauty items

CUSTOMIZATION

— **Size** any dimensions— **Printing** 4-8 color HD, CN/Jp/EN text— **Options** hang hole, tear notch, matte/glossy, foil version, rounded corners.

Three-Side-Seal Medical-Style Pouch

Material

Multi-layer laminated film with tight bonding and stable heat seals. Good moisture, dust and barrier protection; glossy, matte or foil materials optional; meets hygiene requirements for medical and care products with no harmful migration.

Structure & Craft

- **Standard three-side seal** with top hang hole for in-store hook display; ideal for single-item packs.
- Side tear notch; reinforced seals resist cracking and leaks in transit.
- Full-color HD printing: cartoons, instructions, multi-language text and symbols.
- Optional rounded corners prevent bags scratching each other in cartons.

Key Advantages

- ✓ Moisture- and dust-proof protection against contamination
- ✓ Rich printing — cartoon, minimalist or medical styles all supported
- ✓ Hang hole works for both online packs and retail shelves
- ✓ Excellent sealing and toughness for long-distance logistics
- ✓ Wide material choice fits care-patch and medical-consumable standards.

APPLICATIONS

Mouth-nose strips

breathable tapes

fever patches

plasters

disposable care items

medical samples

wound dressings

topical patches

CUSTOMIZATION

- **Size** any dimensions
- **Printing** 4-8 color HD, multi-language
- **Options** hang hole, tear notch, matte/glossy, foil material, rounded corners.

Three-Side-Seal Metallized Pouch

Material

Multi-layer metallized laminate with tight bonding and a built-in aluminum layer for excellent light-blocking and barrier performance. Keeps out light, humidity and air; stable heat sealing, odorless — ideal for topical patches and care products.

Structure & Craft

- **Standard three-side seal** with a top hang hole for shelf display; typically used for single-item packaging.
- Side tear notch for easy opening; reinforced seals resist bursting in logistics.
- Color-printed front with partially metallized back — vivid graphics plus a solid barrier; supports bilingual instructions, diagrams and warnings.
- Optional rounded corners improve hand feel and reduce scratch risk in transit.

Key Advantages

- ✓ Metallized layer blocks light and moisture, extending shelf life
- ✓ Strong print quality — clean commercial or medical styles both work well
- ✓ Hang hole suits e-commerce and physical retail
- ✓ Firm seals and high toughness for long-distance shipping
- ✓ Flexible structure, size adjustable for all patch-type products.

APPLICATIONS

Mouth tapes

fever-cooling patches

plasters

medical dressings

disposable care patches

hand &

foot patches

topical patches

small care consumables

CUSTOMIZATION

- **Size** any dimensions
- **Printing** 4-8 color HD, bilingual graphics
- **Options** hang hole, tear notch, rounded corners, full/partial metallization, matte or glossy.

Three-Side-Seal Zipper Pouch (Foil Look)

Material

Multi-layer metallized laminate with tight bonding; the aluminum layer gives excellent light, oxygen and moisture barrier. Stable heat seals and high toughness prevent essence ingredients from oxidizing — ideal for multi-piece skincare storage.

Structure & Craft

- **Three-side seal + built-in zipper**, resealable after opening; hang hole for shelf display.
- Side tear notch for first opening; tight zipper locks in freshness.
- HD printing in **1-10 colors**: Chinese/Japanese/English text, artwork and ingredient info — perfect for J-beauty styles.
- Rounded corners keep cartons and bags scratch-free in transit.

Key Advantages

- ✓ Resealable zipper protects remaining sheets from damp
- ✓ High-barrier metallized film blocks light and slows oxidation
- ✓ Hang hole for online and offline scenarios
- ✓ Firm seals and tough film for long-haul logistics
- ✓ **1-10 color printing**, matte or glossy — a premium look.

APPLICATIONS

Multi-piece face masks

wet compress cotton

skincare sachets

essence skincare sheets

beauty care sets

daily-chemical portion packs

CUSTOMIZATION

- **Size** any dimensions
- **Printing 1-10 color HD**, multi-language
- **Options** hang hole, tear notch, rounded corners, matte/glossy, full-metallized laminate.

Three-Side-Seal Zipper Pouch (Metallized)

Material

Multi-layer metallized laminate with tight bonding; the aluminum layer gives excellent light, oxygen and moisture barrier. Stable heat seals and high toughness prevent essence ingredients from oxidizing — ideal for multi-piece skincare storage.

Structure & Craft

- **Three-side seal + built-in zipper**, resealable after opening; hang hole for shelf display.
- Side tear notch for first opening; tight zipper locks in freshness.
- HD printing in **1-10 colors**: Chinese/Japanese/English text, artwork and ingredient info — perfect for J-beauty styles.
- Rounded corners keep cartons and bags scratch-free in transit.

Key Advantages

- ✓ Resealable zipper protects remaining sheets from damp
- ✓ High-barrier metallized film blocks light and slows oxidation
- ✓ Hang hole for online and offline scenarios
- ✓ Firm seals and tough film for long-haul logistics
- ✓ **1-10 color printing**, matte or glossy — a premium look.

APPLICATIONS

Multi-piece face masks

essence skincare sheets

wet compress cotton

beauty care sets

skincare sachets

daily-chemical portion packs

CUSTOMIZATION

- **Size** any dimensions
- **Printing 1-10 color HD**, multi-language
- **Options** hang hole, tear notch, rounded corners, matte/glossy, full-metallized laminate.

Three-Side-Seal Zipper Pouch (Patch Packaging)

Material

Multi-layer functional laminate with tight bonding and no delamination; good moisture and oxygen barrier. Stable heat sealing, tear-resistant — keeps water vapor and air away from patch-type products such as care patches and medical tapes.

Structure & Craft

- **Three-side seal + built-in zipper:** high-temperature sealing on three sides with a resealable zipper; hang hole on top for shelf display.
- Side tear notch for easy first opening; zipper bites tightly for dust-proof freshness.
- HD printing in **1-10 colors:** cartoons, multi-language product info and instructions — great for mother-and-baby care or medical consumable styles.
- Rounded corners remove sharp edges so bags survive storage and transport unscratched.

Key Advantages

- ✓ Resealable zipper protects remaining product between uses
- ✓ Laminate keeps moisture and dust out to preserve quality
- ✓ Top hang hole works in both e-commerce and physical stores
- ✓ Strong seals and tough film for long-distance logistics
- ✓ **1-10 color printing** with matte or glossy finish for shelf appeal.

APPLICATIONS

Mouth tapes

fever-cooling patches

acupoint patches

disposable care patches

hand &

foot patches

medical dressings

mother-and-baby care items

patch-type consumables

CUSTOMIZATION

- **Size** any dimensions
- **Printing** 1-10 color HD , multi-language
- **Options** hang hole, tear notch, rounded corners, matte/glossy, metallized or clear laminate.

Three-Side-Seal Window Zipper Pouch

Material

Multi-layer functional laminate with tight bonding, good moisture and oxygen barrier, plus a clear window that shows the product directly. Stable heat seal, tear-resistant.

Structure & Craft

- **Three-side seal + zipper + window:** resealable after opening; hang hole on top for shelf display.
- Side tear notch for easy opening; tight zipper keeps out dust and moisture; the clear window boosts appeal.
- HD printing in **1-10 colors:** cartoons, logos, text — perfect for creative goods, small toys and pop-culture merchandise.
- Rounded corners protect neighboring bags in storage and transit.

Key Advantages

- ✓ Resealable zipper for repeated access, dust- and moisture-proof
- ✓ Clear window shows the product and drives purchase desire
- ✓ Hang hole suits e-commerce and retail alike
- ✓ Strong seals and tough film for long-distance shipping
- ✓ **1-10 colors**, glossy or matte — strong shelf presence for creative packaging.

APPLICATIONS

Cartoon jewelry

pop-toy accessories

figure parts

hair accessories

badges

keychains

small toys

creative merchandise

craft parts

CUSTOMIZATION

- **Size** any dimensions
- **Printing** 1-10 color HD , multi-language
- **Options** hang hole, tear notch, rounded corners, matte/glossy, metallized film, window size.

Three-Side-Seal Color Zipper Pouch

Material

Multi-layer functional laminate — excellent moisture, oxygen and light barrier. Stable heat sealing and high tear resistance keep vapor, light and air away from the contents.

Structure & Craft

- **Three-side seal + built-in zipper**, resealable after opening; top hang hole for shelf display.
- Side tear notch for easy first opening; tight zipper for reliable dust and moisture protection.
- HD printing in **1-10 colors**: Chinese-style festive artwork, logos and copy — great for seasonal goods and daily patches.
- Rounded corners prevent scratching during storage and transport.

Key Advantages

- ✓ Resealable zipper for repeated access and long-lasting protection
- ✓ Light-blocking laminate protects contents from light and humidity
- ✓ Hang hole for both online and offline retail
- ✓ Strong seals, tough film, safe long-distance shipping
- ✓ **1-10 colors** with high saturation, matte or glossy — festive designs really stand out.

APPLICATIONS

Seamless stickers

festive accessories

acupoint patches

warm patches

sachets

jewelry

car accessories

daily patches

celebration goods

CUSTOMIZATION

- **Size** any dimensions
- **Printing** 1-10 color HD , multi-language
- **Options** hang hole, tear notch, rounded corners, matte/glossy, metallized film, custom base color.

Three-Side-Seal Pure Foil Vacuum Bag

Material

Pure aluminum laminate with a dense, ultra-high-barrier foil layer and firmly bonded films. Excellent light, oxygen, moisture and puncture resistance; stable heat sealing designed for vacuum sealing lines.

Structure & Craft

- **One-piece three-side-seal format** without zipper — made for vacuum packing; optional side tear notch.
- Fully opaque with good anti-static protection.
- HD printing in **1–10 colors** for logos and product info.
- Optional rounded corners reduce scratch risk and suit automated packing equipment.

Key Advantages

- ✓ Pure-foil barrier far exceeds metallized bags for freshness and protection
- ✓ Built for vacuum packaging — extends storage life
- ✓ Anti-static — safe for electronic components
- ✓ Firm seals resist pulling with no leaks
- ✓ **1–10 color printing** for custom designs.

APPLICATIONS

Cooked meats

dried foods

herbal powders

electronic parts

light-sensitive chemicals

mask materials

food preservation

hardware — long-term light-proof storage

CUSTOMIZATION

— **Size** any dimensions— **Printing** 1–10 color HD— **Options** tear notch, rounded corners, anti-static, custom thickness.

Pure Foil Quad-Seal Coffee Bag (with One-Way Valve)

Material

Pure aluminum laminate — total light, oxygen and moisture blocking with superb aroma retention. Firm lamination and stable heat seals slow oxidation; a food-grade one-way degassing valve vents CO₂ while keeping air out.

Structure & Craft

- **Quad-seal (side-gusset) format:** four sealed edges, side gussets; filled bags square up beautifully.
- Optional one-way valve — designed for roasted beans and fresh-ground coffee.
- Heat-sealable mouth with optional tear notch.
- HD printing in **1–10 colors** for logo and product info.

Key Advantages

- ✓ Pure foil locks out light and locks in the coffee's original aroma
- ✓ One-way valve releases roasting CO₂ so bags never swell or burst
- ✓ Four firm seals share the load — no burst edges in transit
- ✓ Gusset structure fills square and displays smartly
- ✓ **1–10 color printing** with a premium finish.

APPLICATIONS

Coffee beans

ground coffee

roasted teas

roasted nuts

and other baked foods that release gas

CUSTOMIZATION

- **Size** all dimensions
- **Printing** 1–10 color HD
- **Options** one-way valve, tear notch, thicker film, matte/glossy.

Flat-Bottom Zipper Food Pouch (Pet Food Bag)

Material

Multi-layer food-grade aluminum-plastic laminate (PET/AL/PE) with an excellent light and oxygen barrier. Stiff film prints with bright, faithful colors; meets pet-food safety standards and slows oxidation and moisture pickup.

Structure & Craft

- **Flat-bottom (8-side-seal) format:** the gusseted base opens into a square footing that stands rock-steady — impressive shelf presence
- Built-in zipper reseals after opening; optional one-way degassing valve balances pressure for puffed pet food
- Large-area HD printing on both faces — product photos, brand name, formula and specs; clear window optional
- Four reinforced seals resist pressure and drops without leaking.

Key Advantages

- ✓ **Stand-up flat-bottom format** lifts the brand's shelf image
- ✓ **High-barrier foil laminate** keeps kibble dry and oils from going rancid
- ✓ **Resealable zipper** keeps food fresh between servings
- ✓ **Window or full-foil versions** — visibility vs. maximum freshness
- ✓ **Strong load capacity** for 1.5 kg, 2.5 kg and 5 kg fills.

APPLICATIONS

Cat food

dog food

freeze-dried treats

staple pet food

bird feed

small-pet feed

also grains

USE SCENARIOS

Pet-brand e-commerce, pet stores, feed-factory finished packaging, dry-food freshness packaging.

CUSTOMIZATION

- **Size** custom for 1–10 kg net contents
- **Material** full-foil light-proof or windowed; food-grade one-way valve optional
- **Printing** 4–6 colors both sides — photos, EN/CN copy, nutrition tables, icons
- **Craft** tear notch, rounded corners, matte/gloss textures.

Stand-Up Printed Zipper Pouch (Type 1)

Material

Multi-layer food-grade laminate — soft yet flat, barrier configurable; moisture- and oxygen-proof to slow oxidation of the contents.

Structure & Craft

- Stand-up base keeps filled pouches upright — excellent supermarket display.
- Top self-locking zipper reseals; tear notch for easy access.
- Four-side high-temperature sealing — no powder leaks or breakage.
- HD printing in **1-10 colors** for logos and artwork.

Key Advantages

- ✓ Stable barrier locks in moisture protection and flavor
- ✓ Steady standing format with strong design flexibility
- ✓ Resealable zipper preserves opened product
- ✓ Stretch- and abrasion-resistant film for shipping
- ✓ **1-10 colors** — faithful, premium-looking artwork.

APPLICATIONS

Ground coffee

coffee beans

flower tea

meal-replacement powder

nuts and dried fruit

baked snacks

dried goods

wellness ingredients

CUSTOMIZATION

- **Size** full range custom
- **Printing** plain / 1-10 colors
- **Options** tear notch, hang hole, glossy/matte finish.

Three-Side-Seal Zipper Pouch (PET/PE)

Material

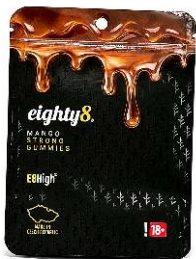

PET/PE dual-layer laminate: the PET face is stiff and flat with high print fidelity; the PE liner seals reliably with basic moisture and oxygen barrier; food-contact safe.

Structure & Craft

- Three-side seal — flat, clean format for small candy and snack portions.
- Top self-locking zipper reseals; optional hang hole for shelf display.
- High-temperature seals on three sides — no burst edges or leaks.
- HD printing in **1-10 colors**: logo, artwork, multi-language layouts.

Key Advantages

- ✓ Stiff PET face resists wrinkles — graphics stay crisp and dimensional
- ✓ Stable PE sealing layer for dependable closure
- ✓ Resealable zipper keeps opened product fresh
- ✓ Optional hang hole for hook display
- ✓ Tough, abrasion-resistant film for transit
- ✓ **1-10 colors**, glossy or matte — a premium finish.

APPLICATIONS

Gummies

candy

dietary gummies

small snacks

aroma granules

herbal extracts

small daily-chemical
accessories

CUSTOMIZATION

— **Size** full range custom— **Printing** plain / 1-10 colors— **Options** hang hole, tear notch, glossy/matte film.

Stand-Up Printed Zipper Pouch (Type 3)

Material

Multi-layer food-grade laminate — soft yet flat, barrier configurable; moisture- and oxygen-proof to slow oxidation of the contents.

Structure & Craft

- Stand-up base keeps filled pouches upright — excellent supermarket display.
- Top self-locking zipper reseals; tear notch for easy access.
- Four-side high-temperature sealing — no powder leaks or breakage.
- HD printing in **1–10 colors** for logos and artwork.

Key Advantages

- ✓ Stable barrier locks in moisture protection and flavor
- ✓ Steady standing format with strong design flexibility
- ✓ Resealable zipper preserves opened product
- ✓ Stretch- and abrasion-resistant film for shipping
- ✓ **1–10 colors** — faithful, premium-looking artwork.

APPLICATIONS

Ground coffee

coffee beans

flower tea

meal-replacement powder

nuts and dried fruit

baked snacks

dried goods

wellness ingredients

CUSTOMIZATION

- **Size** full range custom
- **Printing** plain / 1–10 colors
- **Options** tear notch, hang hole, glossy/matte finish.

Black Window Stand-Up Zipper Pouch

Material

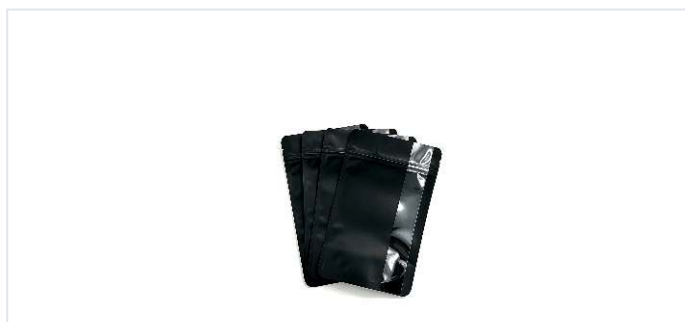

PET/PE dual-layer laminate: crisp PET face with sharp printing; PE liner seals well with basic moisture and oxygen protection; clear window shows the product; food-contact compliant.

Structure & Craft

- Stand-up base — filled bags stand upright for warehouse and shelf display.
- Top self-locking zipper plus tear notches on both sides for easy access.
- Gusseted bottom with high-temperature seals — airtight and crack-free.
- HD printing in **1–10 colors**: logo, artwork, brand copy.

Key Advantages

- ✓ Crisp PET face resists wrinkles — bags look sculpted, graphics stay sharp
- ✓ Reliable PE heat seals
- ✓ Side window shows the contents to boost appeal
- ✓ Matte black finish looks simple and premium
- ✓ Zipper reseals for repeated storage
- ✓ Tough film survives friction and pressure in transit

APPLICATIONS

Digital accessories

small electronics

flower tea

dried-fruit snacks

aromatherapy

jewelry

small hardware

creative goods

CUSTOMIZATION

- **Size** full range custom
- **Printing** plain / 1–10 colors
- **Options** hang hole, window size, glossy/matte film.

Black Metallized Spout Stand-Up Pouch

Material

Metallized laminate — light-, oxygen- and moisture-proof with strong aroma retention; the black film excels at blocking light. Firm bonding, tear-resistant, tightly sealed; food-grade screw spout locks liquids and pastes in without seepage.

Structure & Craft

- **Stand-up spout format** with rounded base — stands steady, saves display space.
- Screw-cap spout opens and recloses easily for controlled pouring.
- Four-side heat seals bear pressure without breakage or leaks.
- HD printing in **1–10 colors** for logo, parameters and artwork.

Key Advantages

- ✓ Black metallized film blocks light to extend shelf life
- ✓ Self-standing shape looks sharp in stores and online
- ✓ Leak-proof screw spout pours precisely, reuses repeatedly
- ✓ Empty pouches fold flat — big transport and storage savings
- ✓ **1–10 colors**, matte or glossy, for diverse brand builds.

APPLICATIONS

Nutrition liquids

personal-care concentrates

inks

coatings

sauces

drinks

chemical liquids

automotive fluids

skincare creams — liquid and paste products

CUSTOMIZATION

— **Size** all dimensions— **Printing** 1–10 color HD— **Options** spout diameters, matte/glossy, thicker film, easy-tear design.

Printed Stand-Up Spout Pouch

Material

Food-grade laminate with excellent toughness and stable heat sealing — leak-proof and tear-resistant. Clear, matte or metallized films optional; the screw spout locks liquid in through repeated opening.

Structure & Craft

- **Stand-up spout format:** rounded base stands upright after filling — neat display, compact storage.
- Angled screw spout for easy filling and pouring — perfect for personal-care and cleaning refills.
- Four-side high-temperature seals resist pressure and leaks over long transport.
- HD printing in **1–10 colors** on both faces for complete brand information.

Key Advantages

- ✓ Fine full-color printing lifts product grade — made for the refill market
- ✓ Self-standing shape displays well at retail
- ✓ Screw cap reseals for measured, repeated use
- ✓ Empty pouches fold flat — big logistics savings vs. bottles
- ✓ Clear-view or light-proof metallized builds available
- ✓ **1–10 colors** with graphics, text and barcodes in one.

APPLICATIONS

Sanitizing spray refills

cleaners

laundry liquid

care solutions

sauces

beverages

skincare concentrates

liquid refills of all kinds

CUSTOMIZATION

- **Size** all dimensions
- **Printing** 1–10 color HD
- **Options** spout diameters, glossy/matte, metallized version, thicker film.

Printed Stand-Up Spout Pouch (Laundry Liquid)

Material

Multi-layer laminate — stretch-resistant, chemical-proof, leak-proof and rub-resistant. Stable heat seals plus a food-grade screw spout with leak-proof cap; built for laundry liquid and household chemicals with no delamination in long storage.

Structure & Craft

- **Stand-up spout format:** rounded self-standing base keeps filled pouches steady — great supermarket and e-commerce display.
- Angled screw spout opens easily, pours cleanly and recloses many times.
- Four-side high-temperature seals carry the weight without bursting or leaking.
- HD printing in **1-10 colors** on both faces — portraits, artwork, parameters, slogans.

Key Advantages

- ✓ Full-color printing (even portraits and illustrations) lifts the product's shelf presence
- ✓ Self-standing shape saves display space
- ✓ Screw cap controls pouring — less waste, ideal for refill packs
- ✓ Flexible body folds flat when empty — far cheaper to ship and store than bottles
- ✓ Laminate resists detergent corrosion
- ✓ **1-10 colors** with graphics, barcodes and copy in one pass.

APPLICATIONS

Fragrance laundry liquid

fabric softener

dish soap

degreaser

household cleaning refills

CUSTOMIZATION

- **Size** all dimensions
- **Printing** 1-10 color HD
- **Options** spout diameters, glossy/matte, thicker film, metallized light-proof version.

Center-Seal Gusset Pouch (Clear Window)

Material

Food-grade clear laminate with color-printed lamination at top and bottom and a clear viewing area in the middle; side-gusset structure with stable heat seals and strong film.

Structure & Craft

- **Center-seal gusset format:** gussets expand sideways after filling for a tidy, standing shape.
- Clear middle window shows the product; colored top/bottom bands add brand recognition and visual rhythm.
- Tight center back seal; machine-sealable on semi- and fully-automatic lines.
- Slim, elongated format made for stick- and column-shaped products.

Key Advantages

- ✓ Clear window shows the goods and attracts customers
- ✓ Gusset design stands crisp after filling — better display
- ✓ Colored bands with custom colors and printing differentiate the brand
- ✓ Laminate keeps moisture and dust out to extend shelf time
- ✓ Long format seals flat without bulging.

APPLICATIONS

Long biscuits

egg rolls

stick pastries

candy

straws

disposable cutlery

flower-tea sticks

long stationery

CUSTOMIZATION

- **Size** width, length, gusset width customizable
- **Printing** custom logo/graphics on the color bands, multi-color
- **Options** tear notch, hang hole, matte or glossy film.

Holographic Center-Seal Gusset Pouch

Material

Holographic metallized laminate: the surface refracts light into shifting rainbow colors; the inner heat-seal layer runs smoothly on sealing equipment and the film is pleasantly tough.

Structure & Craft

- **Long center-seal gusset format:** side gussets expand after filling for a neat, three-dimensional shape.
- Center back seal is tight and flat; compatible with automatic and semi-automatic sealing; the slim body suits stick-shaped products.
- Full holographic body with no window — excellent light blocking.
- Tear notch for easy consumer opening.

Key Advantages

- ✓ Unique holographic look — eye-catching, trendy, premium
- ✓ Metallized structure blocks light, moisture and oxygen
- ✓ Gusset expansion keeps the filled pouch standing crisp for display
- ✓ Tough laminate feeds smoothly on high-speed machines
- ✓ Fully enclosed — dust-proof and aroma-locking for light-sensitive products.

APPLICATIONS

Coffee sticks

instant drink sticks

aroma sticks

straws

makeup tools

pop-culture accessories

long handmade snacks

CUSTOMIZATION

- **Size** width, length and gusset width customizable
- **Printing** logo and artwork, multi-color
- **Options** hang hole, matte surface, tear-notch position.

Pure Foil Duplex Stand-Up Zipper Pouch

Material

Food-grade duplex structure: one face pure aluminum for a high light barrier, the other clear laminate for product visibility. Strong against oxygen, vapor and UV; puncture-resistant and tough — freshness plus display in one bag.

Structure & Craft

- **Stand-up bottom** keeps filled bags upright for tidy storage and shelving.
- Top zipper reseals repeatedly; optional hang hole for hanging display.
- Four-side high-temperature sealing — tight, leak-free, no burst edges.
- HD printing in **1–10 colors**: brand graphics on the foil face, product view through the clear face.

Key Advantages

- ✓ Duplex design: one side preserves, the other side sells
- ✓ Pure foil blocks moisture, oxidation and light to extend shelf life
- ✓ Stable standing format with a resealable zipper
- ✓ Firm seals handle solids, granules and powders alike
- ✓ **1–10 colors** for high brand recognition.

APPLICATIONS

Flower tea

nut snacks

dried herbs

baking ingredients

health foods

pet food

beauty portions

hardware parts

CUSTOMIZATION

— **Size** full range custom— **Printing** 1–10 color HD— **Options** matte/glossy, thicker film, tear notch, hang hole.

Metallized Stand-Up Zipper Pouch

Material

PET metallized laminate: a thin aluminum layer is vacuum-deposited on the film, giving a mirror-silver look close to foil pouches at a lower cost.

Structure & Craft

- **Top self-locking zipper** for repeated resealing; serrated tear notches on both sides for easy first opening.
- **Heat-sealed edges** are tight and tear-resistant; round hang hole optional for supermarket display.

Key Advantages

- ✓ Good moisture and oxygen barrier for everyday storage needs
- ✓ Flexible body resists pinholes from repeated bending
- ✓ Sleek metallic-silver look, full-surface printing and brand patterns supported
- ✓ Resealable zipper for repeated use; hang hole option suits e-commerce and retail display
- ✓ Soft, space-saving empty bags — overall cost better than pure foil pouches.

APPLICATIONS

Snacks

dried goods

tea portions

personal-care samples

health powder

gifts

CUSTOMIZATION

- **Size** stock sizes available, custom tooling supported
- **Printing** multi-color both sides, matte or glossy finish
- **Options** round hang hole, rounded corners.

Holographic Three-Side-Seal Zipper Pouch

Material

Holographic metallized laminate — the surface shows rainbow laser effects that shift with the light; inner heat-seal layer offers a solid barrier and firm seals.

Structure & Craft

- **Three-side-seal zipper format:** flat, thin profile saves storage space.
- Zipper reseals repeatedly for multiple uses.
- Euro hang hole for hook display plus tear notch for easy opening.
- Fully opaque laser film blocks light; precise seals resist bursting and leaks.

Key Advantages

- ✓ Eye-catching holographic look — strong shelf differentiation
- ✓ Metallized layer keeps out moisture, oxygen and light
- ✓ Thin three-side-seal build saves packaging cost
- ✓ Reliable resealable zipper, highly practical
- ✓ Tough film survives courier shipping of small goods.

APPLICATIONS

Jewelry

beauty samples

digital accessories

trading cards

pop-toy parts

aromatherapy supplies

craft parts

electronic components

small commodities

CUSTOMIZATION

- **Size** custom dimensions
- **Printing** logo and artwork, multi-color
- **Options** hang-hole style, zipper color, matte lamination, tear-notch position.

Pearl-Film Duplex Hang-Hole Pouch

Material

Pearl-film laminate — white pearlescent film on one face, clear film on the other (duplex structure). The pearl face is fine and crisp; the clear side shows the product; layers bond firmly.

Structure & Craft

- Three-side seal with flat, firm edges; round hang hole on top for hook display; side tear notch for easy opening.
- Duplex design: one face blocks light and looks refined, the other shows the goods — display plus protection.
- HD printing in **1–10 colors**: logo, parameters, warnings and more.

Key Advantages

- ✓ Clean, premium pearl finish upgrades the packaging
- ✓ Duplex structure: clear side shows the item, pearl side carries brand info
- ✓ Built-in hang hole for shelf selling, online and offline
- ✓ Good moisture and dust protection for small items
- ✓ Tough film resists tearing
- ✓ **1–10 colors** with plenty of layout freedom.

APPLICATIONS

Small hardware

beauty tools

digital accessories

earphones

cables

jewelry

small creative goods

makeup accessories

CUSTOMIZATION

- **Size** standard plus custom sizes
- **Printing** plain / 1–10 colors
- **Options** hang-hole style, tear notch, film thickness.

Panda Die-Cut Cartoon Ziplock Pouch

Material

Clear food-grade laminated film — flexible, puncture-resistant and well-sealed. Glossy, see-through body with a built-in press-rib closure that stays tight through repeated use; moisture- and dust-proof for snacks and small items.

Structure & Craft

- **Cartoon die-cut shape:** panda outline with 3D ears — novel, eye-catching, unlike any standard bag.
- Top press-seal rib closes again and again to keep contents fresh.
- Three-side heat sealing — strong edges with steady load capacity.
- HD printing in **1–10 colors** on both faces: cartoon artwork, logo, text.

Key Advantages

- ✓ Creative die-cut design with high shelf appeal — perfect for viral snacks and gifts
- ✓ Transparent body shows the product and drives purchases
- ✓ Press-rib closure reseals repeatedly for freshness
- ✓ Food-safe, tough material
- ✓ **1–10 colors** — free customization of characters and artwork.

APPLICATIONS

Candy

biscuits

pastries

freeze-dried snacks

handmade desserts

jewelry

small toys

creative gifts

bakery portions

CUSTOMIZATION

— **Size** multiple specs— **Printing** 1–10 color HD— **Options** glossy/matte, thicker film, metallized light-proof version, other cartoon shapes.

Breast Milk Storage Bag

Material

Food-grade laminated film free of harmful substances; tough and cold-resistant for fridge and freezer storage. Double-sealed construction resists bursting and leaks; high clarity for milk storage and long freshness.

Structure & Craft

- **Bottle-shaped die-cut design** with side tear notch and a self-standing bottom that stays put after filling.
- Double zipper seal — dual temperature lock and leak protection that won't pop open, keeping liquid and bacteria out.
- Printed volume scale plus name/date/time writing area for easy organizing.
- HD printing in **1–10 colors**: logo, safety notes, multi-language instructions.

Key Advantages

- ✓ Food-contact-safe material, freezer-proof — made for mother and baby
- ✓ Double press seals give excellent leak protection on the go
- ✓ Self-standing base with a clear scale for measured storage
- ✓ Die-cut tear notch opens without scissors
- ✓ **1–10 colors** with multi-language versions for domestic and export orders.

APPLICATIONS

Breast milk storage

baby-food liquids

beverage sample storage

CUSTOMIZATION

- **Size** multiple capacities
- **Printing** 1–10 color HD
- **Options** glossy/matte, thicker film, light-proof metallized version, capacity variants.

Clear Three-Side-Seal Retort Pouch

Material

High-temperature PA/PE retort laminate — withstands boiling and steam sterilization. Firm bonding, good clarity, impact- and puncture-resistant.

Structure & Craft

- **Three-side seal** with precise edges and a filling margin, ready for vacuum sealers.
- Retort-grade film recipe survives boiling and steam sterilizing without swelling, delamination or bursting.
- Highly transparent body — contents visible at a glance for easy identification and sale.
- Even film gauge and stable sealing; compatible with semi- and fully-automatic vacuum equipment.

Key Advantages

- ✓ Withstands high-temperature sterilization — extends food shelf life
- ✓ Tough PA base resists punctures — safe even with bone-in or hard foods
- ✓ Clear display; blocks vapor and air against damp and oxidation
- ✓ High seal strength keeps vacuum packs airtight
- ✓ Food-safe and odorless.

APPLICATIONS

Braised meats

ready meals

boiled ingredients

vacuum marinated food

seafood

sterilized foods

CUSTOMIZATION

- **Size** any dimensions
- **Printing** color logos and product info
- **Options** film thickness, tear notch, higher-temperature grades, matte finish, anti-static.

Metallized Auto-Packaging Roll Film

Material

PET metallized laminate: vacuum-deposited aluminum on a plastic base film gives a mirror-silver, light-blocking look — engineered for continuous runs on automatic packaging machines.

Structure & Craft

- **One-piece roll stock** for vertical and horizontal form-fill-seal machines — bags are formed inline, no pre-made pouches needed
- **Stable heat-seal layer** with a wide temperature window — flat, solid seals with no skips
- **Continuous printing** of repeating artwork, text and scales (as in segment-label printing); the smooth surface feeds without jams
- **Slight translucency** with basic light and moisture protection.

Key Advantages

- ✓ Good moisture and oxygen barrier for routine portion packaging
- ✓ Flexible film survives high-speed tension without snapping
- ✓ Premium metallic look, full-coverage or registered printing
- ✓ Roll-fed automation saves labor — built for volume production
- ✓ Compact storage, better cost than pure foil roll — great value.

APPLICATIONS

Powders and granules

snacks

tea portions

daily-chemical materials

health products

small consumables

CUSTOMIZATION

- **Specs** custom width, slit to length
- **Printing** registered multi-color both sides, matte/glossy
- **Options** anti-static, tear lines, registration marks.

Natural Kraft Flat-Bottom Zipper Pouch (No Valve)

Material

Raw natural kraft outside, high-barrier aluminum laminate inside. The kraft face shows a natural vintage grain; the foil liner blocks light, oxygen, moisture and UV to keep flavors stable. Food-safe materials.

Structure & Craft

- **Flat-bottom construction:** gusseted base fills out square and self-standing — neat shelf presentation
- **Resealable zipper** with side tear notch for easy first opening
- **Eight-side heat sealing** — strong seams, excellent load capacity, no leaks or bursts
- **No one-way valve** — unlike the coffee version, made for products that don't off-gas.

Key Advantages

- ✓ Vintage kraft look — simple and premium for creative, organic and new-consumer brands
- ✓ Foil liner's barrier beats ordinary paper bags for freshness
- ✓ Stand-up format works for warehouse shipping and retail display
- ✓ Zipper recloses to cut waste
- ✓ Blank stock supports custom logo printing.

APPLICATIONS

Tea

dried nuts

flower tea

baked pastries

grains

handmade snacks

herbal materials

CUSTOMIZATION

- **Size** from sample sachets to bulk formats
- **Printing** color both sides, mono hot-stamping, matte lamination
- **Upgrades** one-way valve, window, rounded corners.

Kraft Flat-Bottom Coffee Bag (with One-Way Valve)

Material

Natural kraft paper outside, high-barrier aluminum foil laminate inside. The kraft face has a warm vintage texture; the foil liner blocks light, oxygen and moisture. Odorless, food-contact compliant — built to keep roasted beans and ground coffee fresh.

Structure & Craft

- **Flat-bottom (8-side-seal) format:** the gusseted base opens square so bags stand rock-steady with a strong 3D presence
- Built-in zipper reseals after opening; serrated tear notch for the first opening
- Optional food-grade one-way valve vents roasting CO₂ while keeping air out to prevent oxidation
- Four reinforced seals resist crushing; mono or multi-color logo printing.

Key Advantages

- ✓ **Vintage kraft look** matches specialty coffee and bakery brands
- ✓ **Foil liner's high barrier** slows coffee-oil oxidation
- ✓ **One-way valve** solves the swelling problem of freshly roasted beans
- ✓ **Resealable zipper** locks aroma back in after every serving
- ✓ **Handsome stand-up format** for shipping and shelf alike.

APPLICATIONS

Roasted coffee beans

ground coffee

tea

nuts

baked dry goods

CUSTOMIZATION

- **Size** 125 g, 250 g, 500 g, 1 kg and other coffee formats
- **Material** natural or white kraft; window or full-foil; valve optional
- **Printing** 4–6 colors both sides — logo, origin, flavor notes, icons
- **Craft** tear notch, rounded corners, matte/gloss.

Kraft Paper Three-Side-Seal Flat Bag

Material

Kraft paper — thick, crisp, natural and eco-friendly with a rustic touch.

Structure & Craft

- **Three-side seal** with a flat, minimalist body.
- Round hang hole for hook display; side tear notch for easy opening.
- Surface prints graphics and text directly.
- Sealed with a standard heat sealer — simple structure, easy processing.

Key Advantages

- ✓ Raw kraft look — natural, eco and quietly premium
- ✓ Paper surface prints beautifully for logos and product info
- ✓ Breathable — ideal for products that don't need an air barrier
- ✓ Tough, light, stackable — low storage footprint
- ✓ Versatile blank canvas for all kinds of products.

APPLICATIONS

Dried flowers

paper stationery

fabric accessories

dry goods (short-term)

handicrafts

small jewelry

gift samples

farm produce

CUSTOMIZATION

- **Size** custom dimensions
- **Printing** mono or multi-color brand graphics
- **Options** paper weight, hang-hole style, waterproof coating, self-adhesive closure.

Kraft Window Tin-Tie Stand-Up Bag

Material

Natural kraft paper laminated with an inner moisture-proof coating — crisp, water-resistant paper with a clear window showing the contents.

Structure & Craft

- **Side-gusset stand-up format** with folded bottom — stands upright when filled, displays neatly.
- Tin-tie closure at the mouth folds shut and reopens easily — no sealing machine needed.
- Clear front window shows the goods; serrated mouth for easy opening.
- Side gussets expand capacity and give a solid, three-dimensional shape.

Key Advantages

- ✓ Raw kraft look with a warm, natural food-packaging feel
- ✓ Inner coating blocks water and oil to extend freshness
- ✓ Tin-tie recloses again and again for easy access
- ✓ Window view attracts shoppers
- ✓ Self-standing — goes straight onto store shelves.

APPLICATIONS

Baked cookies

snowflake crisps

tea

roasted nuts

flower tea

dried fruit

candy

handmade snacks

local specialties

CUSTOMIZATION

- **Size** custom dimensions
- **Printing** mono or full color
- **Options** white kraft, window size, thicker paper, tin-tie styles.

Kraft Stand-Up Zipper Pouch

Material

Kraft paper outside + PET/PE laminate inside: crisp paper with an excellent sealing film — paper texture plus plastic-level moisture protection, firmly bonded.

Structure & Craft

- **Stand-up format** with gusseted bottom — filled bags stand tall and tidy on shelves.
- Self-locking zipper reseals repeatedly for continued freshness.
- Hang hole optional for hanging display.
- Natural kraft outside, PET/PE moisture barrier inside — dual paper-film protection.

Key Advantages

- ✓ Natural kraft look suits food, dry goods and farm produce
- ✓ PET/PE liner guards against moisture, dust and light oxidation
- ✓ Crisp body never slumps — strong standing display
- ✓ Zipper keeps flavor and dryness locked in after opening
- ✓ Paper prints logos and product info crisply.

APPLICATIONS

Coffee beans

tea

nuts and dried goods

grains

baked foods

flower tea

artisanal snacks

pet food

CUSTOMIZATION

- **Size** stock sizes plus custom
- **Printing** color or mono, custom graphics
- **Options** window, one-way valve, thicker material, hang hole, matte finish.

Kraft/PE Window Stand-Up Zipper Pouch

Material

Kraft paper outside + PE film inside: the paper is crisp and shapely, the PE layer heat-seals well; firm lamination with basic moisture and dust protection.

Structure & Craft

- **Stand-up format** with a gusseted bottom — filled bags stand neatly on the shelf.
- Clear window shows the contents, combining natural kraft texture with product visibility.
- Self-locking zipper reseals repeatedly for multiple servings.
- Side tear notch for easy opening; hang hole optional for hanging display.

Key Advantages

- ✓ Natural kraft look fits organic and artisanal product positioning
- ✓ PE liner seals tightly against water vapor and dust
- ✓ Window view lifts purchase appeal
- ✓ Crisp body stays upright — great standing display
- ✓ Paper surface prints logos and product info beautifully
- ✓ Flexible material resists tearing in transit.

APPLICATIONS

Tea

flower tea

nuts

grains

baked snacks

dried goods

artisanal ingredients

pet food

CUSTOMIZATION

- **Size** stock sizes plus custom
- **Printing** mono or full color
- **Options** window size, thicker material, one-way valve, hang hole, matte lamination.

Eco Rice-Paper Three-Side-Seal Bag

Material

Biodegradable rice paper (straw-fiber paper) laminated with a heat-seal layer. The surface carries a natural fiber texture with a distinctive touch; sealing is stable and fully eco-compliant.

Structure & Craft

- **Standard three-side seal**, flat and crisp with a thin profile that saves storage space.
- Round hang hole and serrated tear notch for retail display and quick opening.
- Natural fiber texture looks premium; single/double-sided color printing performs beautifully.
- Biodegradable material meets low-carbon packaging trends at home and abroad.

Key Advantages

- ✓ Natural fiber look stands out from plastic bags — artistic and premium
- ✓ Degradable material satisfies overseas environmental regulations for export
- ✓ Firm three-side seals keep dust and moisture out
- ✓ Thin and light — lower freight and storage cost
- ✓ Custom logo printing, CE and other certification marks supported.

APPLICATIONS

Electronic accessories

small acoustic parts

aroma tablets

skincare samples

tea sachets

creative merchandise

small medical accessories

export eco-friendly small goods

CUSTOMIZATION

- **Size** custom dimensions
- **Printing** single/double-sided multi-color, spot colors, logos
- **Options** window, hang-hole position, upgraded barrier layer.

Non-Woven Snap-Button Storage Bag

Material

Made of non-woven fabric — light, breathable and pleasantly tough. Eco-friendly, odorless, fine to the touch and reusable; sides are stitch-sewn for durability.

Structure & Craft

- Flat bag with fold-over flap and plastic snap button — closes firmly, opens easily, reusable.
- Precise stitching keeps the bag flat with no fraying.
- HD printing in **1–8 colors**: logo, artwork, text.
- Custom sizes; white, black or colored fabric available.

Key Advantages

- ✓ Breathable fabric prevents damp and stuffiness — ideal for clothing and textiles
- ✓ Snap closure is secure yet easy to reopen
- ✓ Solid stitching carries weight; folds flat for storage
- ✓ Reusable eco material matches green-brand values
- ✓ **1–8 color printing** with a clean, minimalist look.

APPLICATIONS

Clothing	underwear
home textiles	scarves
accessories	shoes and hats

CUSTOMIZATION

- **Size** any dimensions
- **Printing** 1–8 color HD
- **Options** colored fabric, thicker fabric, snap styles.

PE Flat Bag

Material

Blown from virgin LDPE — highly transparent, soft and tough, tear- and cold-resistant. Odorless, eco-friendly material meeting general packaging standards for apparel, hardware, food and daily goods.

Structure & Craft

- Sealed bottom with an open flat mouth — no zipper; close with any heat sealer after filling
- Flat, clear body with high visibility; strong bottom and side seals resist bursting
- Supplied on rolls or as finished bags; mono/color logo printing; hang holes on request.

Key Advantages

- ✓ **Automation-ready:** the flat mouth feeds straight into automatic sealing lines for high-volume packing
- ✓ **Soft and product-safe** — never scratches garments, plastics or electronics
- ✓ **Flexible specs** from tiny parts to large garment bags
- ✓ **Stable dust and moisture protection**
- ✓ **Cost-effective:** rich stock sizes, volume-friendly pricing.

APPLICATIONS

Apparel

home textiles

hardware

electronics inner packaging

material portioning

primary food packaging

protective outer bags

USE SCENARIOS

Automated factory lines, garment packing, e-commerce inner protection, industrial parts portioning.

CUSTOMIZATION

- **Size & gauge** custom
- **Printing** single/double-sided logos and warnings
- **Extras** hang hole, tear notch, anti-static, thicker film
- **Supply** finished bags or tube roll film.

PE Slider Zipper Bag

Material

Virgin LDPE film — highly transparent, flexible and tear-resistant, odorless and eco-friendly. The soft film never scratches contents; meets gift, household and mother-and-baby packaging standards.

Structure & Craft

- **Upgraded slider zipper:** push-pull opening with a tight seal, reusable many times, dust- and moisture-proof
- Three-side heat-sealed, fully transparent body shows the product; pre-punched hang hole available for hook display
- Single/double-sided color printing of English copy, logos and decorative type; firm seals with no edge leaks.

Key Advantages

- ✓ **Smooth slider experience** — seals tighter than ordinary press ribs and won't pop open
- ✓ **Crystal-clear body** showcases kit contents and lifts shelf appeal
- ✓ **Soft PE** protects jewelry, textiles and toiletries
- ✓ **Reusable** — customers keep using the bag for storage, adding value
- ✓ **Highly customizable** size, printing and hang hole.

APPLICATIONS

Mother-and-baby emergency kits

travel toiletry sets

jewelry

stationery

garment accessories

small gifts

creative merchandise

household kits

shown here as cross-border gift-set packaging

USE SCENARIOS

Cross-border gift packaging, boutique retail sets, travel kits, mother-and-baby set packaging.

CUSTOMIZATION

- **Size** free customization for all kit combinations
- **Printing** 4–6 colors single/double side, script fonts and brand marks
- **Options** hang hole, film thickness, clear or frosted film
- **Zipper** slider or standard press rib.

PE Ziplock Bag

Material

Blown from virgin **LDPE** — highly transparent, tough, tear- and cold-resistant. Non-toxic and odorless, meeting food, daily-goods and hardware standards; contents show clearly through the film.

Structure & Craft

- One-piece interlocking press-seal rib — press to close, reopen endlessly, no heat sealer needed
- Three-side sealed with a flat bottom; round hang hole optional for shelf display
- Flat, clear body prints logos in mono or color; tight seals don't split or leak.

Key Advantages

- ✓ **Universally useful:** industrial parts, food portions, small goods, sample storage
- ✓ **Simple to use** — hand-sealed, ideal for small-batch packing and e-commerce
- ✓ **Crystal-clear** view of the contents
- ✓ **Stretch-resistant** — carries weight without tearing
- ✓ **Outstanding value:** full size range, deep stock, custom sizes and gauges.

APPLICATIONS

Small electronics

hardware parts

jewelry

stationery

garment accessories

food portions

samples

cables

small toys

USE SCENARIOS

Factory portioning, e-commerce packing, retail small goods, sample bags, simple food storage.

CUSTOMIZATION

- **Size & gauge** custom widths and lengths, 2–10 wire thickness
- **Printing** single/double-sided logos, text, warnings
- **Extras** hang hole, anti-static.

CPE Frosted Flat Bag

Material

CPE cast-polyethylene film with a natural matte, frosted finish and a fine, soft touch. Flexible and tear-resistant with a low-friction surface that never scratches products; clean, odorless material; anti-static version available — the 3C industry standard.

Structure & Craft

- Semi-translucent frosted look — refined and discreet, showing the product without fully exposing it
- Punch holes on demand — round hang holes for shelf display; single/double-sided logo printing
- Tight, flat seals that don't crack; the soft body protects electronic housings.

Key Advantages

- ✓ **Premium frosted texture** upgrades digital-product packaging beyond clear plastic
- ✓ **Strong scratch protection** for power banks and phone cases in transit
- ✓ **Automation-friendly:** the flat-mouth format suits continuous heat-sealing lines
- ✓ **Flexible in the cold** — stays supple at low temperature
- ✓ **Rich customization:** size, thickness, hang hole, logo, anti-static.

APPLICATIONS

Magnetic power banks

phone cases

cables

earphones

chargers

3C accessories

USE SCENARIOS

3C factory inner packaging, cross-border electronics packing, branded accessory packaging, smart-hardware dust protection.

CUSTOMIZATION

- **Size** custom to fit power banks, phone accessories and more
- **Printing** single/double-sided, mono or multi-color
- **Upgrades** anti-static CPE, hang hole, thickness
- **Styles** flat bag or press-seal bag.

CPE Frosted Ziplock Bag (Matte Press-Seal)

Material

CPE cast-polyethylene film with a fine matte, frosted finish and a soft touch. Tear-resistant, low-friction so it never scratches product surfaces; odorless material; anti-static version available — the standard choice for 3C accessory packaging.

Structure & Craft

- **Integrated press-to-seal rib closure** — press to seal, reopen any number of times, no heat-sealing equipment needed.
- Semi-translucent frosted body balances privacy with product display; firm side seals keep the bag flat and wrinkle-free.
- Single/multi-color logo printing; round hang hole available for retail display.
- Soft film protects power banks, phone cases and plastic housings from scratches.

Key Advantages

- ✓ **Premium frosted texture** — a step above ordinary clear ziplocks
- ✓ **Resealable rib closure** for easy repeated access
- ✓ **Excellent scratch protection** thanks to the low-friction surface
- ✓ **No equipment needed** — hand-sealed, ideal for e-commerce packing and factory kitting
- ✓ **Flexible customization** of size, thickness, printing, hang hole and anti-static.

APPLICATIONS

Magnetic power banks

phone cases

cables

earphones

chargers

screen protectors and other 3C accessories

small electronics and plastic parts

USE SCENARIOS

3C inner packaging, cross-border accessory packing, smart-hardware dust protection, branded small-item retail.

CUSTOMIZATION

- **Size** fully custom
- **Printing** single/double-sided, mono or full color
- **Upgrades** anti-static CPE, hang hole, thickness adjustment
- **Styles** open-top or press-seal.

BOPP Header Flat Bag (Slim Watch-Strap Format)

Material

Glossy BOPP film + pearlescent film, body and printed header formed in one piece. Bright, stiff film with saturated print colors; clean, odorless material meeting Korean and Southeast-Asian export standards for accessories.

Structure & Craft

- Printed header with round hang hole for hook display
- Slim vertical format with an open bottom for heat sealing after filling; stitched-line printing detail along the sides looks refined
- Large upper print area with a clear front; both faces print Korean, English and other copy, logos, diagrams and barcodes
- Two-zone layout: clear lower window shows the strap, upper zone carries the brand.

Key Advantages

- ✓ **Made for slim goods:** the narrow format hugs straps, pens and slender accessories
- ✓ **Refined look** with stitch lines, color blocks and multi-language type — clean Korean-style design
- ✓ **Two display modes:** hang on shelves or stand in showcases
- ✓ **Stable protection** against dust, damp and scratches in transit
- ✓ **Highly customizable:** free sizing, gloss/matte switch, multi-language, diagrams, barcodes.

APPLICATIONS

Quartz watch straps	slim jewelry
gel pens	cables
slender stationery	beauty tools

CUSTOMIZATION

- **Format** multiple slim sizes for straps and long accessories
- **Printing** 4–6 colors both sides, KR/EN/CN layouts, diagrams, barcodes
- **Film** glossy or pearl BOPP.

BOPP Header Self-Adhesive Bag (Slim Stationery Format)

Material

Glossy BOPP + pearlescent film, header and body in one piece. Bright, stiff surface with faithful print colors; eco-friendly, odorless — compliant for Southeast Asia, Singapore and other overseas markets.

Structure & Craft

- Printed header with round hang hole for shelf hooks
- **Single-use self-adhesive strip**: peel to seal; cannot be restored once opened — tamper-evident
- Slim vertical format with a clear lower window that shows pens and slender stationery; both faces print logos, English copy, QR codes, website info and award marks
- Flat, firm seals; no wrinkles or whitening over long transport.

Key Advantages

- ✓ **Purpose-built slim format** hugs pens and long stationery efficiently
- ✓ **Strong brand canvas**: both faces carry brand story, website, social QR and certifications
- ✓ **Tamper-evident adhesive** keeps retail goods intact
- ✓ **Flexible display** — hang or stand in stationery cases
- ✓ **Rich customization** of size, colors and layout; gloss or matte film.

APPLICATIONS

Gel pens

fountain pens

refills

rulers

bookmarks

slim creative accessories

CUSTOMIZATION

- **Format** multiple slim sizes for pens and long accessories
- **Printing** 4–6 colors both sides — EN/CN copy, graphics, QR, website, awards
- **Film** glossy BOPP (high clarity) or matte BOPP.

BOPP Header Bag

Material

High-clarity BOPP film with a reinforced laminated header — crisp, highly transparent, smooth and glossy. Eco-friendly, odorless, PVC-free; meets standard export packaging requirements.

Structure & Craft

- **Standard euro hang hole** in the header hangs straight onto retail hooks and display stands
- Firm, flat side seals; heat-sealable closure
- Fully transparent front shows the product; the back takes large-area printed information
- Neat, stiff format resists wrinkles and transit deformation.

Key Advantages

- ✓ **Excellent display:** high-clarity BOPP shows the product in HD with faithful print colors
- ✓ **Shelf-ready:** integrated header and hole — no extra fittings
- ✓ **Dust- and moisture-proof** dense film protects the contents
- ✓ **Flexible customization** of size, gauge and single/double-sided printing
- ✓ **Great value** — cheaper than laminated pouches for standardized small items.

APPLICATIONS

Card storage pages

board-game parts

stationery

jewelry

3C accessories

small toys

beauty samples

Magic and similar)

USE SCENARIOS

Cross-border e-commerce retail, supermarket shelf sales, creative card products.

CUSTOMIZATION

- **Size** custom to fit the goods
- **Printing** 4 or 6 colors front/back — logo, instructions, multi-language (EN/AR export layouts)
- **Craft** matte BOPP, tear notch, wider seals
- **Gauge** 30–60 μm , thicker for extra stiffness.

BOPP Header Bag (Card-Sleeve Format)

Material

High-clarity BOPP film with a reinforced laminated header — outstanding light transmission, stiffness and gloss. Eco-friendly, odorless, PVC-free; meets US/EU cross-border packaging standards.

Structure & Craft

- One-piece header punched with a **standard euro hang hole** for store and supermarket hooks
- High-temperature side seals — firm and flat with no burst edges; flat bottom lets goods stand upright
- Clear front shows the card sleeves; the back takes full-color printing of illustrations, specs, QR/barcodes and multi-language info
- Tough film resists creases and whitening over long transport.

Key Advantages

- ✓ **Strong display power:** crystal clarity plus faithful colors — ideal for cards, board games and pop-culture goods
- ✓ **Two display modes:** hang on hooks or stand on desks and showcases
- ✓ **Dust and moisture protection** for the sleeves inside
- ✓ **High customization:** size, gloss/matte, 4–6 color double-sided printing, optional tear notch
- ✓ **Controlled cost** — cheaper than laminated pouches for volume packaging.

APPLICATIONS

Card sleeves

board-game parts

TCG merchandise

card pages

game tokens

badges

EU board-game market

CUSTOMIZATION

- **Size** precisely fitted to sleeve formats
- **Printing** front/back color — vintage illustrations, logo, specs, multi-language, QR and barcodes
- **Film** glossy or matte BOPP.

BOPP Header Self-Adhesive Bag

Material

High-clarity BOPP film body with an integrated printed header. Glossy, stiff film with excellent print reproduction; eco-friendly material meeting US/EU export compliance.

Structure & Craft

- Printed header with a **standard euro hang hole** — hangs straight onto retail hooks, ideal for chain stores and cross-border shops
- **Continuous self-adhesive strip** seals once and cannot be restored — dust-proof and tamper-evident
- One-piece build with a clear front for direct display; both faces print logos, IP artwork, websites, social handles and compliance marks
- Firm side seals; the slim format suits long, thin goods.

Key Advantages

- ✓ **Outstanding shelf display:** glossy clarity shows the product; large print areas carry brand IP — great for licensed merchandise
- ✓ **Tamper-evident adhesive** keeps goods sealed until purchase
- ✓ **Shelf-ready:** euro-hole header hangs without extra packaging
- ✓ **Highly customizable:** dimensions, gloss/matte BOPP, multi-color printing, multi-country compliance marks
- ✓ **Thin yet crisp** — no wrinkles, no whitening in transit.

APPLICATIONS

Dart shafts

dart accessories

slim jewelry

pens

long stationery

model parts

CUSTOMIZATION

- **Format** slim, standard or wide versions to fit the product
- **Printing** 4–6 colors both sides — IP artwork, logo, website, social icons
- **Film** glossy or matte BOPP
- **Options** tear notch, reinforced seals.

PO Self-Adhesive Mailing Bag (Printed)

Material

Virgin PO polyethylene film — soft-glow translucent, light, flexible and highly stretch-resistant. Odorless, low-static so it won't attract dust; made for printed matter, paper goods and creative products; passes export environmental tests.

Structure & Craft

- **Single-use self-adhesive strip:** peel and stick to seal; once opened it cannot be restored — tamper-evident
- Three-side sealed, flat and crisp; large-area color printing for logos, bilingual info, contact details and check-box fields
- Soft translucent look balances privacy with quick identification; even seals survive long-distance transport.

Key Advantages

- ✓ **Tamper-evident closure** protects publications and documents in transit
- ✓ **PO film stretches without tearing** — thinner yet tougher than ordinary PE, better packing economics
- ✓ **Low static** won't cling to paper or scuff printed surfaces
- ✓ **Stable print quality** for standardized corporate packaging
- ✓ **Thin and light** — smaller parcels, lower shipping cost.

APPLICATIONS

Magazines

journals

contracts

art books

posters

receipts

paper stationery

USE SCENARIOS

Journal subscription mailing, print e-commerce, corporate document packaging, publication retail, creative paper goods.

CUSTOMIZATION

- **Size** custom for magazines, A4 documents, albums, posters
- **Printing** 4-6 colors, single/double side, bilingual copy, checklists, brand marks
- **Options** adhesive position, film thickness, hang hole
- **Clarity** high-clear or soft translucent PO.

PVC Die-Cut Printed Press-Seal Bag (Cable Packaging)

Material

High-clarity PVC film with excellent gloss and stiffness; waterproof, fold-resistant, and prints with saturated, faithful colors. Die-cut shapes give strong shelf identity — widely used for branded 3C accessories.

Structure & Craft

- **Die-cut rounded body + printed header card in one piece**, with a pre-punched euro hang hole for shelf hooks
- Press-to-seal rib closure — press to seal, reopen repeatedly
- Large clear front window shows the cable; both faces print in full color for logos, model info, English copy, eco marks and spec boxes; rounded bottom corners are safe to handle.

Key Advantages

- ✓ **Distinctive die-cut outline** stands out from ordinary rectangles on the shelf
- ✓ **Integrated color header** concentrates brand visuals — ideal for accessory brands
- ✓ **Built-in press seal**: no heat sealer needed; resealable after retail opening
- ✓ **Crystal PVC** shows the product fully while keeping water and dust out
- ✓ **Integrated hang hole** goes straight onto the shelf — no extra tag.

APPLICATIONS

USB cables

charging cables

earphones

small digital accessories

chargers

USE SCENARIOS

Cross-border 3C accessories, digital stores, supermarket electronics.

CUSTOMIZATION

- **Shape** multiple die-cut outlines — rounded, arc-bottom, irregular
- **Printing** 4–6 colors both sides — English copy, model, eco icons, QR codes
- **Material** glossy or matte PVC; PE/CPE alternatives
- **Options** hang-hole size, press rib or slider zipper, tear notch.

POF Shrink Film (Shrink Tubing)

Material

POF polyolefin eco-friendly heat-shrink film, phthalate-free and compliant with US/EU food-grade standards. High-gloss, highly transparent, flexible, crack-resistant at low temperature, with even and stable shrinkage.

Structure & Craft

- Seamless tube structure slips straight over the product — works with automatic shrink tunnels or hand heat guns
- Shrinks evenly in all directions, hugging the product contour with almost no wrinkles or burn-through
- Tough film with post-shrink puncture resistance; odorless and clean-burning.

Key Advantages

- ✓ **Eco-compliant:** PVC-free, passes cross-border retail and export environmental testing
- ✓ **Neat, glossy shrink finish** shows off the product and lifts perceived quality
- ✓ **Works with many heaters:** heat guns, constant-temperature shrink machines, tunnel lines
- ✓ **Low-temperature tolerance** — suitable for frozen product overwrap
- ✓ **Dust- and moisture-proof**, tamper-evident sealed protection.

APPLICATIONS

Gift boxes

books

tableware

electronics

cosmetics

albums

crafts

food overwrap

widely used for retail unit sealing

USE SCENARIOS

Automated factory sealing lines, e-commerce packaging, gift boxes, stationery, personal care and food overwrap.

CUSTOMIZATION

- **Specs** custom lay-flat width and thickness; can be cut into flat bags
- **Function** standard, high-shrink or low-temperature grades
- **Printing** single/multi-color logo and warning marks
- **Supply** rolls or pre-made shrink bags.

PE Die-Cut Handle Garment Bag (Type 1)

Material

Blown from virgin PE — tough, stretch-resistant film that resists tearing, with a bright, smooth surface. Waterproof and dust-proof with firm heat seals and steady load capacity.

Structure & Craft

- **Flat-mouth die-cut handle design** — the integrated punched grip needs no extra rope; three-side sealed, crisp body.
- Solid base colors available: black, blue, white and more.
- HD printing in **1–5 colors**: logo, website, slogans.
- Custom thickness and sizes; suits automated packing.

Key Advantages

- ✓ Built-in handle makes carrying easy — a better shopping experience
- ✓ Waterproof PE protects clothing and accessories from damp and stains
- ✓ High tensile strength — won't stretch out or snap
- ✓ Opaque solid colors protect privacy — ideal for e-commerce and retail
- ✓ **1–5 color printing** with crisp graphics for brand impact.

APPLICATIONS

Clothing

underwear

shoes and hats

handbags

accessories

beauty products

e-commerce parcels and in-store shopping bags

CUSTOMIZATION

- **Size** any length, width and thickness
- **Printing** 1–5 color HD
- **Options** multiple solid film colors.

PE Die-Cut Handle Garment Bag (Type 2)

Material

Blown from virgin PE — tough, stretch-resistant film that resists tearing, with a bright, smooth surface. Waterproof and dust-proof with firm heat seals and steady load capacity.

Structure & Craft

- **Flat-mouth die-cut handle design** — the integrated punched grip needs no extra rope; three-side sealed, crisp body.
- Solid base colors available: black, blue, white and more.
- HD printing in **1–5 colors**: logo, website, slogans.
- Custom thickness and sizes; suits automated packing.

Key Advantages

- ✓ Built-in handle makes carrying easy — a better shopping experience
- ✓ Waterproof PE protects clothing and accessories from damp and stains
- ✓ High tensile strength — won't stretch out or snap
- ✓ Opaque solid colors protect privacy — ideal for e-commerce and retail
- ✓ **1–5 color printing** with crisp graphics for brand impact.

APPLICATIONS

Clothing

underwear

shoes and hats

handbags

accessories

beauty products

e-commerce parcels and in-store shopping bags

CUSTOMIZATION

- **Size** any length, width and thickness
- **Printing** 1–5 color HD
- **Options** multiple solid film colors.

Pearlescent Bubble Mailer (Ty...

Pearlescent Bubble Mailer (Ty...

PVC Bubble Zipper Bag

Anti-Static Shielding Zipper B...

EPE Foam Pouch

Material

Made from EPE expanded-polyethylene laminated film — soft, elastic and highly cushioning. Moisture-proof, anti-static version optional; smooth surface never scratches products.

Structure & Craft

- Heat-sealed edges are firm and crack-resistant; standard open-top style, self-adhesive closure available.
- Light, thin and flexible — wraps irregular shapes and folds flat for storage.
- High-definition printing in **1–4 colors**: logo, recycling marks, product info.

Key Advantages

- ✓ Highly elastic cushioning against impact, pressure and scratches — protects precision parts
- ✓ Moisture- and dust-proof, ultra-light — adds almost no shipping weight
- ✓ Anti-static version available for electronic components
- ✓ Soft touch, no hard edges — safe for painted surfaces and screens
- ✓ **1–4 color printing** for brand recognition.

APPLICATIONS

Digital accessories

lithium batteries

screen panels

hardware parts

lenses

jewelry

small precision electronics

plastic housings

CUSTOMIZATION

- **Size** fully customizable
- **Printing** plain / 1–4 colors
- **Function** standard or anti-static
- **Style** open-top or self-adhesive.

Pearlescent Bubble Mailer (Type 1)

Material

Pearlescent film outside, bubble film inside. The pearl layer is glossy and stiff; the bubble layer cushions the contents; the two layers bond firmly.

Structure & Craft

- Envelope style with heat-pressed side seals; self-adhesive strip closes in one step and is tamper-evident.
- Even, plump bubbles give consistent shock absorption.
- HD printing in **1–4 colors**: logo, artwork, brand text.

Key Advantages

- ✓ Elegant pearl finish upgrades the parcel's look
- ✓ Waterproof and dust-proof to protect the goods
- ✓ Bubble layer absorbs impacts in transit
- ✓ Built-in adhesive strip — no extra tape needed
- ✓ Tough film resists stretching and tearing on long routes
- ✓ Ultra-light — saves courier costs

APPLICATIONS

Cosmetics

jewelry

3C accessories

creative gifts

fashion accessories

eyewear

small electronics

CUSTOMIZATION

— **Size** stock sizes plus custom— **Printing** plain / 1–4 colors— **Options** pearl color shades, thicker bubbles, custom body color.

Pearlescent Bubble Mailer (Type 2)

Material

Pearlescent film outside, bubble film inside. The pearl layer is glossy and stiff; the bubble layer cushions the contents; the two layers bond firmly.

Structure & Craft

- Envelope style with heat-pressed side seals; self-adhesive strip closes in one step and is tamper-evident.
- Even, plump bubbles give consistent shock absorption.
- HD printing in **1–4 colors**: logo, artwork, brand text.

Key Advantages

- ✓ Elegant pearl finish upgrades the parcel's look
- ✓ Waterproof and dust-proof to protect the goods
- ✓ Bubble layer absorbs impacts in transit
- ✓ Built-in adhesive strip — no extra tape needed
- ✓ Tough film resists stretching and tearing on long routes
- ✓ Ultra-light — saves courier costs

APPLICATIONS

Cosmetics

jewelry

3C accessories

creative gifts

fashion accessories

eyewear

small electronics

CUSTOMIZATION

- **Size** stock sizes plus custom
- **Printing** plain / 1–4 colors
- **Options** pearl color shades, thicker bubbles, custom body color.

Pearlescent Bubble Mailer (Type 3)

Material

Pearlescent film outside, bubble film inside. The pearl layer is glossy and stiff; the bubble layer cushions the contents; the two layers bond firmly.

Structure & Craft

- Envelope style with heat-pressed side seals; self-adhesive strip closes in one step and is tamper-evident.
- Even, plump bubbles give consistent shock absorption.
- HD printing in **1–4 colors**: logo, artwork, brand text.

Key Advantages

- ✓ Elegant pearl finish upgrades the parcel's look
- ✓ Waterproof and dust-proof to protect the goods
- ✓ Bubble layer absorbs impacts in transit
- ✓ Built-in adhesive strip — no extra tape needed
- ✓ Tough film resists stretching and tearing on long routes
- ✓ Ultra-light — saves courier costs

APPLICATIONS

Cosmetics

jewelry

3C accessories

creative gifts

fashion accessories

eyewear

small electronics

CUSTOMIZATION

— **Size** stock sizes plus custom

— **Printing** plain / 1–4 colors

— **Options** pearl color shades, thicker bubbles, custom body color.

PVC Bubble Zipper Bag

Material

Glossy PVC outer film laminated to an inner bubble film. The PVC layer is bright and shapely; the bubble layer cushions; waterproof, moisture-proof, prints beautifully — a refined, premium feel.

Structure & Craft

- **Slider zipper** glides smoothly and reseals for repeated storage
- PVC + bubble layers heat-pressed in one piece with a distinctive heart-shaped bubble texture; strong three-side seals with no delamination
- Color printing of logos and graphics; multiple film colors; crisp shape displays well.

Key Advantages

- ✓ **PVC face keeps its shape** — no slumping like plain PE bubble bags
- ✓ **Built-in cushioning** — storage and shock protection in one, no extra bubble wrap
- ✓ **Heart-bubble texture** looks adorable — perfect for beauty, gifts and jewelry
- ✓ **Waterproof, dust-proof, impact-resistant** through transit
- ✓ **Durable slider zipper** keeps serving customers as a storage pouch.

APPLICATIONS

Makeup sets

jewelry

handmade gifts

postcards

small digital accessories

creative merchandise

small crafts

USE SCENARIOS

Beauty e-commerce, boutique jewelry retail, craft packaging, cross-border gift packaging.

CUSTOMIZATION

- **Size** custom dimensions for all small gifts
- **Printing** 4–6 colors both sides
- **Styles** heart or round bubble texture, multiple PVC colors, slider or press-rib closure
- **Extras** hang hole, film thickness, rounded corners.

Anti-Static Shielding Zipper Bag (ESD Shielding Bag)

Material

Anti-static shielding laminate built with a multi-layer process, combining EMI shielding and anti-static protection. Layers bond firmly without delamination, heat-sealing is stable, and the film is also moisture-proof and light-blocking.

Structure & Craft

- **Three-side-seal format** with a flat, tidy bag body, ideal for packing small electronic components.
- Self-locking zipper on top supports repeated opening and closing for testing and re-storage.
- Tear notch on the side for easy opening; hang hole available on request for retail display.
- Anti-static outer layer plus metallized shielding layer isolates external static and EMI.

Key Advantages

- ✓ EMI shielding blocks static fields and electromagnetic waves to protect precision electronics
- ✓ Prevents static build-up and ESD damage to components
- ✓ Metallized layer blocks light and moisture, with dust-proof and anti-oxidation benefits
- ✓ Resealable zipper makes sampling, testing and turnover convenient
- ✓ Tough and tear-resistant — survives logistics handling
- ✓ Surface printable with logo, warning marks and product info.

APPLICATIONS

PCBs

chips

sensors

data cables

memory modules

small electronic modules

CUSTOMIZATION

- **Size** multiple stock sizes, custom dimensions supported
- **Printing** ESD warning symbols and brand graphics
- **Options** thicker film, hang hole, matte or glossy surface.

How We Work & What We Offer

01

Consultation

Share product size, material needs, artwork or a physical sample

02

Proposal & Quote

We recommend format and film structure with an itemized quote

03

Sampling

Digital or physical proofs; flexible small-batch support

04

Plate & Production

Cylinder making then scheduling - fully in-house production

05

Quality Inspection

Incoming, in-process and final inspection with test reports

06
